Director

Electric Service

RE: Request for special consideration from the electric service company to maintain functioning of medical equipment.

Dear Director:

This letter concerns the special needs of the infant of:

_____ Name of Parent	_____ Address
_____ Phone Number	_____

who has been diagnosed as "at risk" for respiratory and/or cardiac problems during sleep. Because of the infant's susceptibility to apnea (abnormal pauses in breathing) and bradycardia (slow heart rate), our Company is providing a home apnea monitor at the prescription of Dr. _____.

The monitor, by way of an audible alarm, notifies the parents if the child stops breathing or if the heart rate changes abnormally. In case of such an event, the parents have been taught to take corrective action. However, it is imperative that the electrical power to this family's home be maintained at all times. Please place this family on a priority list for restoration of electrical service and be readily available in case of a electrical failure. Also, if there is a forewarning of an electric interruption, please notify this family so that proper arrangements can be made for emergency electric alternatives.

Thank you for your help and support.

Sincerely,
